Complete guide to modifying Bus suspension. brakes and chassis for max performance. Essential information on using aftermarket and interchangeable parts to achieve maximum performance. Covers all T1 & T2 buses, vans, campers & pick-ups 1950-79, and much applies to T3 models 1979-82.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: ▪Build an accurate threat model for your vehicle ▪Reverse engineer the CAN bus to fake engine signals ▪Exploit vulnerabilities in diagnostic and data-logging systems ▪Hack the ECU and other firmware and embedded systems ▪Feed exploits through infotainment and vehicle-to-vehicle communication systems ▪Override factory settings with performance-tuning techniques ▪Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.
