Maximum air pressure 150 p.s.i. Max output pressure 7500 p.s.i.

OWNER/OPERATOR MANUAL - McGee Company

The fluoroelastomer diaphragm withstands higher temperatures than a neoprene diaphragm and has better resistance to fuel such as gasoline and kerosene. These pumps have large internal pathways and check valves with flaps to accommodate thick sewage, abrasive slurries, and industrial waste with large solids that would damage standard air-powered transfer pumps.

Air-Powered Pumps | McMaster-Carr

Description Model 82050 is an air operated chassis pump designed to pump low and medium viscosity materials (grease) from drums and pails.

2 1 2 in. Air motor chassis high pressure pump 50:1

Lincoln 82050 model is an air operated chassis pump designed to pump low and medium viscosity materials (grease) from 120 lb drums and pails. This pump can develop 7500 PSI working pressure at 150 PSI maximum incoming air pressure. Includes Pump Only, No Accessories. See bottom of page for Grease Pump Kit options. Features: Ratio: 50:1

Model 82050 High Pressure 50:1 Grease Pump - Lincoln ...

Series 20 grease pumps include the time proven 20 cubic inch displacement Lincoln air motor with 2-1/2" stroke—ideal for most applications. Series 40 grease pumps include the time proven 40 cubic inch displacement Lincoln air motor with 4-1/2" stroke—ideal for high volume applications.
