Key changes in EI 1581 6th edition The key changes in the 6th edition of EI 1581 include: - a new low dirt/low water type (type S-M) intended for mobile applications. The new S-M type is a combination of the former type S-LD and S-LW. All EI 1581 5th edition type S-LW systems are automatically qualified to 1581 6th edition type S-M, at the

Operations Bulletin

The API/EI 1581, 3rd or 5th Edition qualified coalescers are manufactured using multi-layered particulate capture media and a resin impregnated glass fiber coalescing core. No metal center-tube is used in order to provide efficient coalescence and reduce restriction allowing the filter to be crushable and incinerable for disposal.
