Inventory
Abstract. The present study describes an Arabic cross-cultural validation of the Beck Depression Inventory. An Arab sample of 53 cases was subjected to the original validation procedures which involved a preliminary exercise and a translation from English to Arabic. Acceptable equivalent meanings of Beck's

A brief history. The Beck Depression Inventory (BDI) is a 21-item self-reporting questionnaire for evaluating the severity of depression in normal and psychiatric populations [1, 2]. Developed by Beck et al. in 1961, it relied on the theory of negative cognitive distortions as central to depression [1]. It underwent revisions in 1978: the BDI-IA and
