Offers revision for the Applied Knowledge Test (AKT). Featuring over 300 questions and with chapters mirroring the GP syllabus, this book provides practice of various questions format used in the exam. It presents answers with explanations to help develop learning and understanding.

The CAM coach brings together the writing partnership of Mark Shields and Simon Martin. Mark is a Nationally renowned NLP coach and Trainer and Simon a veteran natural health journalist and editor of CAM, the monthly magazine for practitioners of complementary and alternative medicine. Between them they have come up with a host of proven secrets, strategies and evidenced techniques of how to successfully set up and run a Complementary Health Practice. The CAM coach is based upon Mark Shields Coaching for Practitioners Series in CAM magazine which has been proven to help, coach, inspire and motivate many practitioners over the years This together with expert contributions from industry leading experts such as Mike Ash, Jayney Goddard, Anthony Haynes and Kate Neil makes the CAM Coach a unique and valuable resource for anyone looking to work successfully in the Complementary and Alternative Medicine industry

For the last four decades, Tedric Harris' Rolling Bearing Analysis has been the "bible" for engineers involved in rolling bearing technology. Why do so many students and practicing engineers rely on this book? The answer is simple: because of its complete coverage from low- to high-speed applications and full derivations of the underlying mathematics from a leader in the field. Updated, revamped, and reorganized for the new millennium, the fifth incarnation of this classic reference is the most modern, flexible, and interactive tool in the field. What makes this edition so revolutionary? For starters, the coverage is split conveniently into two books: Essential Concepts of Bearing Technology introduces the fundamentals involved in the use, design, and performance of rolling bearings for more common applications; Advanced Concepts of Bearing Technology delves into more advanced topics involving more dynamic loading, more extreme conditions, and higher-speed applications. Furthermore, each book in this edition includes a CD-ROM that contains numerical examples as well as tables of dimensional, mounting, and life-rating data obtained from ABMA/ANSI standards. Whether you are interested in the mathematics behind the empirical values or methods for estimating the effects of complex stresses on fatigue endurance, Rolling Bearing Analysis, Fifth Edition compiles the techniques and the data that you need in a single, authoritative resource.

"This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

A statistician and a journalist reveal the real story behind the statistics on risk, chance, and choice

The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

The fifth edition of this best-selling introductory text has been updated to reflect the latest trends and statistics in community health in an effort to effectively address the health issues facing today's communities. with emphasis on developing the knowledge and skills necessary for a career in health education, an Introduction to Community Health, Fifth Edition, covers such topics as epidemiology, community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety, and occupational health.

Selected Proceedings of the Xth Public Relations World Congress 'Between People and Power', Amsterdam, June 3-7, 1985.

Analyses the contexts, drivers and outcomes of community action and planning in the global north: from emergent neighbourhood planning in England to the community-based housing movement in New York, and from active citizenship in the Dutch new towns to associative action in Marseille.
