how companies use new digital technologies to maximize customer engagement and shape brand conversations, experiences, and communities.

A half century of political domination of Indonesia is chronicled in this revealing account of the man widely regarded as the "Father of Indonesia."

This book constitutes the thoroughly refereed post-conference proceedings of the Satellite Events of the 14th European Conference on the Semantic Web, ESWC 2017, held in Portoroz, Slovenia, in May/June 2017. The volume contains 8 poster and 24 demonstration papers, selected from 105 submissions. Additionally, this book includes a selection of 13 best workshop papers. The papers cover various aspects of the semantic web. The chapter 'Scholia, Scientometrics and Wikidata' is available open access under a CC BY 4.0 license via [link.springer.com](http://link.springer.com).

Poetry. "Make it muscular and be apparent in it," observes Houdini's amanuensis, "words are also escapes." And so they are in a book with the sinew of ANATOMY OF KEYS. In this, Steven Price's brilliant first collection, the familiar contours of Harry Houdini's life are traced anew, from his arrival in America as a child named Ehrich Weiss to the stomach punch that caused an untimely death, and on that armature Price builds a profound reading of Houdini's time and ours. These poems--improbable escapes, astonishingly executed through the figure of Houdini--form the spine of a deep and ardent meditation on what is. "The long poem will never be the same again thanks to Steven Price's remarkable gift as a poet. He has produced for us a masterpiece, a book to be

thankful for"--Patrick Lane. Steven Price's work has appeared previously in *Breathing Fire 2*. He is a graduate of the University of Virginia Writing Program, and currently teaches writing at the University of Victoria.

This is a book about how civilians suffer in war and why people decide that they should. Most civilian suffering in war is deliberate and always has been. Massacres, rape, displacement, famine and disease are usually designed. They are policies in war. In meetings or on mobile phones, political and military leaders decide that civilians are appropriate or inevitable targets. The principle that unarmed and innocent people should be protected in war is an ancient, precious but fragile idea. Today, the principle of civilian immunity is enshrined in modern international law and cherished by many. But, in practice, leaders in most wars reject the principle. Using detailed historical and contemporary examples, *Killing Civilians* looks at the many ways in which civilians suffer in wars and analyses the main anti-civilian ideologies which insist upon such suffering. It also exposes the very real ambiguity in much civilian identity which is used to justify extreme hostility. But this is also, above all, a book about why civilians should be protected. Throughout its pages, *Killing Civilians* argues for a morality of limited warfare in which tolerance, mercy and restraint are used to draw boundaries to violence. At the heart of the book are important new frameworks for understanding patterns of civilian suffering, ideologies of violence and strategies for promoting the protection of civilians. This is the first major treatment of the hard questions of civilian identity and protection in war for many years. Written by one of the humanitarian world's leading thinkers and former aid worker, it provides a unique and accessible text on the subject for professional and public readerships alike.

`This is an excellent and exciting book which makes a compelling case for social development. It more than succeeds in its objective of providing a comprehensive overview of the field of social development - International Social Work

Why attractive things work better and other crucial insights into human-centered design Emotions are inseparable from how we humans think, choose, and act. In Emotional Design, cognitive scientist Don Norman shows how the principles of human psychology apply to the invention and design of new technologies and products. In The Design of Everyday Things, Norman made the definitive case for human-centered design, showing that good design demanded that the user's must take precedence over a designer's aesthetic if anything, from light switches to airplanes, was going to work as the user needed. In this book, he takes his thinking several steps farther, showing that successful design must incorporate not just what users need, but must address our minds by attending to our visceral reactions, to our behavioral choices, and to the stories we want the things in our lives to tell others about ourselves. Good human-centered design isn't just about making effective tools that are straightforward to use; it's about making affective tools that mesh well with our emotions and help us express our identities and support our social lives. From roller coasters to robots, sports cars to smart phones, attractive things work better. Whether designer or consumer, user or inventor, this book is the definitive guide to making Norman's insights work for you.

governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.
