Get the must-have reference on standards and best practices for the delivery of a construction project. The CSI Practice Guides are a library of comprehensive references specifically and carefully designed for the construction professional. Each book examines important concepts and best practices integral to a particular aspect of the construction process. Laying the foundation for this series, The CSI Project Delivery Practice Guide provides fundamental knowledge for the documentation, administration, and successful delivery of construction projects. It also serves as the pivotal starting point for understanding CSI's core values, as well as a useful study aid for those wishing to obtain the Construction Documents Technologist certificate. This easy-to-follow guide: Is a great introduction to the construction process for the new practitioner. Functions as a ready reference for the experienced construction professional. Packaged with the book is an access code which allows access to a password-protected web site with bonus content, including a PDF of the printed book and samples of CSI format documents, such as UniFormat and SectionFormat/PageFormat. The CSI Project Delivery Practice Guide offers general information all construction professionals need for understanding their roles in the delivery of a construction project. Key principles are presented and discussed in detail to allow the reader to take full advantage of material covered in depth by the more specialized CSI Practice Guides. If you can own only one Practice Guide, this is the one to get.

This third edition of the standard construction specifications writing guide has been updated to include new information on linking specifications to computer databases and to other parts of the design process. Construction Specifications Writing shows how to organize documents, consolidate the Federal government systems, generate well-researched mastertexts, automate specifications, write more condensed text, use full-time specifications consultants, and use the new knowledge-based specifying systems.

Get the must-have reference on construction contract administration -- and the essential study aid for the Certified Construction Contract Administrator (CCCA) Exam. The CSI Construction Contract Administration Practice Guide: Takes an in-depth look at standard contract documents and their successful use in construction projects. Provides expert commentary on various standard forms and their use in documenting design decisions made during project construction and providing for clear project communications. Discusses the roles and responsibilities of all parties to construction agreements and their effective management. Packaged with the book is an access code which provides access to a password-protected Web site with bonus content, including a PDF of the printed book and copies of CSI format documents, such as UniFormat and SectionFormat/PageFormat. This easy-to-follow guide offers invaluable tips all construction professionals can immediately put to use for improving the overall skill and efficiency of document preparation that accurately conveys stated goals, ensuring that all interested individuals receive fair representation throughout the entire construction process. Part of the CSI Practice Guides, a library of comprehensive references specifically and carefully designed for the construction professional. Each book examines important concepts and best practices integral to a particular aspect of the building process.

CD-ROM contains: Samples of all AIA contract documents.

The authoritative resource for the organization, preparation, use, and interpretation of construction documents encompassing the entire life cycle of a facility. This new edition considers the need for interdependent processes of design, construction and facility use. The Fifth Edition expands the scope of the manual to meet the requirements of all participants involved in a construction project in a stage-by-stage progression, including owners, A/E's, design-builders, contractors, construction managers, product representatives, financial institutions, regulatory authorities, attorneys, and facility managers. It promotes a team model for successful implementation.
