Data Science is booming thanks to R and Python, but Java brings the robustness, convenience, and ability to scale critical to today’s data science applications. With this practical book, Java software engineers looking to add data science skills will take a logical journey through the data science pipeline. Author Michael Brzustowicz explains the basic math theory behind each step of the data science process, as well as how to apply these concepts with Java. You’ll learn the critical roles that data IO, linear algebra, statistics, data operations, learning and prediction, and Hadoop MapReduce play in the process. Throughout this book, you’ll find code examples you can use in your applications. Examine methods for obtaining, cleaning, and arranging data into its purest form Understand the matrix structure that your data should take Learn basic concepts for testing the origin and validity of data Transform your data into stable and usable numerical values Understand supervised and unsupervised learning algorithms, and methods for evaluating their success Get up and running with MapReduce, using customized components suitable for data science algorithms

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Rich in titles on English life and social history, this collection spans the world as it was known to eighteenth-century historians and explorers. Titles include a wealth of travel accounts and diaries, histories of nations from throughout the world, and maps and charts of a world that was still being discovered. Students of the War of American Independence will find fascinating accounts from the British side of conflict. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. Sid 'One-Punch' Luft, amateur-boxer, producer and Judy Garland's third husband was the one man in her life who stuck around, helping her achieve a meteoric comeback in the 1960s. It was Luft who reversed the fortunes of an apparently faded career, seeing her triumph at Carnegie Hall, in 'A Star Is Born' and 'The Judy Garland Show'. Previously unpublished, Sid Luft's intimate autobiography tells their story in hard-boiled yet elegant prose. It begins on a fateful night in New York City when the not-quite-divorced Judy and the not-quite-divorced Sid meet at Billy Reed's Little Club. A straight-talking sharp shooter, Sid fell for Judy hard and fast and the romance persisted through separations, reconciliations, and later divorce. However, her drug dependencies and suicidal tendencies put a tremendous strain on the relationship. Sid did not complete his memoir; it ended in 1960 after Judy hired David Begelman and Freddie Fields to manage her career. But Randy L. Schmidt, acclaimed editor of Judy Garland on Judy Garland, seamlessly pieced together the final section of the book from extensive interviews with Sid, most previously unpublished. Despite everything, Sid never stopped loving Judy and never forgave himself for not being able to save her from the demons that ultimately drove her to an early death at age forty-seven in 1969. Sid served as chief conservator of the Garland legacy until his death at the age of eighty-nine in 2005. This is his testament to the love of his life. "In prose so brassy that it bruises the sensibilities, Luft... illuminates the dark side of life in the spotlight and dispels any sentimental illusions about the glories of show business in Hollywood's classic age." - The New Yorker

Is nature all there is? John Haught examines this question and in doing so addresses a fundamental issue in the dialogue of science with religion. The belief that nature is all there is and that no overall purpose exists in the universe is known broadly as 'naturalism'. Naturalism, in this context, denies the existence of any realities distinct from the natural world and human culture. Since the rise of science in the modern world has had so much influence on naturalism's intellectual acceptance, the author focuses on 'scientific' naturalism and the way in which its defenders are now attempting to put a distance between contemporary thought and humanity's religious traditions. Haught seeks to provide a reasonable, scientifically informed alternative to naturalism. His approach will provide the basis for lively discussion among students, scholars, scientists, theologians and intellectually curious people in general.

This paper assesses Lesotho’s Third Review Under the Poverty Reduction and Growth Facility (PRGF) Arrangement and Request for Waivers of Performance Criteria. The government has declared a state of famine that is affecting an estimated 900,000 people. One quantitative performance criterion for end-March 2002—the ceiling on the government’s domestic financing requirement—was not observed, almost entirely because of delays in external payments. The authorities have requested, and IMF staff supports, a waiver on this performance criterion.
