Five hundred years ago the great walled city of Constantinople fell under the relentless siege of the Ottoman Turks led by Sultan Mehmed II, Mehmed the Conqueror. Kristovoulos, one of the vanquished Greeks, later entered into the service of the Conqueror and began to write a history of the Sultan's life, starting with the year 1451, the beginning of Mehmed's 31-year reign. Death apparently prevented Kristovoulos from completing his account, but the manuscript covering the first seventeen years has been preserved and this exciting chronicle is here translated into English for the first time. Charles T. Riggs, who died in February 1953 at Robert College in modern Istanbul, was a missionary in the Near East. Originally published in 1954. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

The issue of Muslim reactions to the Franks has been an important part of studies of both the Crusades and Islamic History, but rarely the main focus. This book examines the reactions of the Muslims of the Levant to the arrival and presence of the Franks in the crusading period, 1097-1291, focussing on those outside the politico-military and religious elites. It provides a thematic overview of the various ways in which these 'non-elites' of Muslim society, both inside and outside of the Latin states, reacted to the Franks, arguing that it was they, as much as the more famous Muslim rulers, who were initiators of resistance to the Franks. This study challenges existing views of the Muslim reaction to the crusaders as rather slow and demonstrates that jihad against the Franks started as soon as they arrived. It further demonstrates the difference between the concepts of jihad and of Counter-Crusade, and highlights two distinct phases in the jihad against the Franks: the 'unofficial jihad' - that which occurred before uniting of religious and political classes - and the 'official jihad' - which happened after and due to this unification, and which has formed the basis of modern discussions. Finally, the study also argues that the Muslim non-elites who encountered the Franks did not always resist them, but at various times either helped or were unresisting to them, thus focussing attention away from conflict and onto cooperation. In considering Muslim reactions to the Franks in the context of wider discourses, this study also highlights aspects of the nature of Islamic society in Egypt and Syria in the medieval period, particularly the non-elite section of society, which is often ignored. The main conclusions also shed light on discourses of collaboration and resistance which are currently focussed almost exclusively on the modern period or the medieval west.

The observations of a 16th-century Habsburg ambassador to Constantinople.

Award-winning author Sylvain Neuvel explores an immigration dystopia in *The Test* Britain, the not-too-distant future. Idir is sitting the British Citizenship Test. He wants his family to belong. Twenty-five questions to determine their fate. Twenty-five chances to impress. When the test takes an unexpected and tragic turn, Idir is handed the power of life and death. How do you value a life when all you have is multiple choice? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

American geopolitical interests and the potential threats to those interests are both on the rise in East Africa. The author places the spread of militant Islamism and the development of radical Islamist networks in East Africa in the broader context of the social, economic, and political factors that have shaped the region's security environment.

The classic study of post-Cold War international relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization

cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. The Clash of Civilizations and the Remaking of World Order explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly “ universal ” Western ideals, and intensify interciviliation conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world.

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “ dead ” drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll ’ s patterns could be used to design a three-dimensional vault.
