The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

(McGraw-Hill, 2004) Develop a command of the essential formulas and concepts that underlie income-property investing: \* Capitalization Rate \* Net Operating Income \* Present Value \* Debt Coverage Ratio \* Internal Rate of Return and much more Here Gallinelli revisits the 37 key metrics from his Cash Flow book and guides you through examples that will lead you to mastery of those concepts. He then takes you beyond those formulas to the next level, with detailed case studies of four different properties: \* Single-Family Rental \* Renovation Project \* Apartment Building \* Strip Shopping Center You'll analyze these properties with him and learn to look behind the numbers, to think like a successful investor and to recognize both the opportunities and the perils you might encounter when you invest in real estate. Frank Gallinelli is the founder and President of RealData, Inc., one of the real estate industry's leading software firms since 1982. He has written several books and numerous articles on real estate investing, and teaches income-property analysis in Columbia University's Master of Science in Real Estate Development program.

Jules Marchenoir is a revenant—an undead being whose fate forces him to sacrifice himself over and over again to save human lives. He's spent the better part of the last century flirting his way through Paris, but when he met Kate Mercier, the heroine from Amy Plum's Die for Me trilogy, he knew his afterlife had changed forever and he had found the love of his life. Until Kate fell for his best friend, Vincent. Now Jules is faced with an impossible decision: choosing between his loyal friend and a love truly worth dying for. Yakub is a Black Scientist introduced to the public by Elijah Muhammad. Elijah Muhammad told of his history as being the father of mankind or the maker of the white race. This teaching proved to be one of the most explosive within the Nation of Islam's theological and mathematical doctrine. Thought to be a myth, especially among those who gravitated more towards Orthodox Islam, which by the way, don't accept Elijah Muhammad as being authentic, but since the cloning of the sheep Dolly and other organic species, the facts that Elijah Muhammad attributed to this man cannot be discounted unless we all suddenly agree that "Dolly" never happened.

Imperial Contagions argues that there was no straightforward shift from older, enclavist models of colonial medicine to a newer emphasis on prevention and treatment of disease among indigenous populations as well as European residents. It shows that colonial medicine was not at all homogeneous "on the ground" but was riven with tensions and contradictions. Indigenous elites contested and appropriated Western medical knowledge and practices for their own purposes. Colonial policies contained contradictory and cross-cutting impulses. This book challenges assumptions that colonial regimes were uniformly able to regulate indigenous bodies and that colonial medicine served as a "tool of empire."
