MS ACCESS Tutorial: Learn with Example

Open Access. If Access is already open, select File > New. Select Blank database, or select a template. Enter a name for the database, select a location, and then select Create. If needed, select Enable content in the yellow message bar when the database opens. For more info, see Create a new database.

Create a database in Access - Access

Access always adds page and report header and footer sections in pairs. That is, you cannot add a page or report header section without also adding the corresponding footer section. If you do not need both sections, you cannot delete a section, but you can resize the unused section to a height of zero (0) to avoid adding extra vertical spacing to your report.

Intro to Access. Create an Access database. Add tables. Use relationships. Add and edit data. Manage data with queries. Create forms. Create reports. Protect databases.

Access video training - Access - support.microsoft.com

When you use Microsoft Access, you often need to work with values that are not directly in your data. For example, you want to calculate sales tax on an order, or calculate the total value of the order itself. You can calculate these values by using expressions. To use expressions, you write them by using proper syntax.
